

Spot Color Option

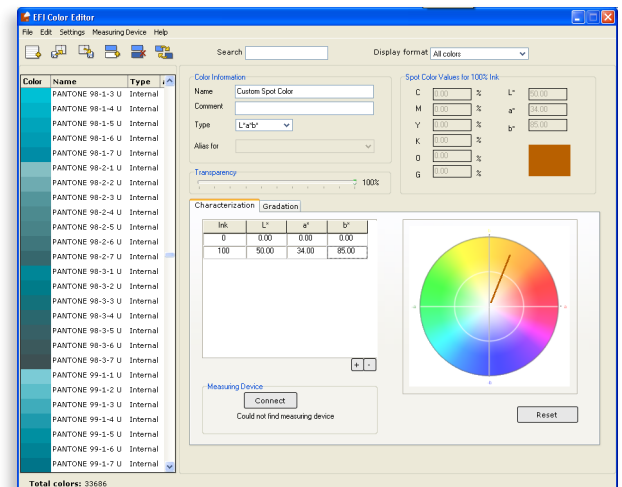

Spot colors ensure individuality

Achieving consistent colors across all media is vital for ensuring a company presents a seamless corporate identity. Corporate and business colors are therefore defined as spot colors to ensure a uniform identity and to maintain brand image. The Spot Color Option enables you to offer your customers the correct reproduction of their own custom colors.

Perfect color for every company

The Spot Color Option enables simple processing and true-color output of jobs with spot colors. The solution allows for an unlimited number of spot colors per job, meaning there are no limits to what you can achieve, nor any constraints on your customers' requirements.

Close cooperation with the leading providers of spot color systems such as Pantone, HKS, Toyo and DIC ensures that the EFI Colorproof XF and EFI Fiery XF definitions match the original definitions. The complete special color libraries for Pantone, HKS and HKS 3000 Plus, Toyo and DIC are included.

Functions to tackle the toughest demands

The Spot Color Option offers a number of high-performance functions that even satisfy the comprehensive requirements of the packaging industry, e.g. functions for defining spot colors, their transparency, additional gradation curves and much more.

XF Solutions

EFI's portfolio of integrated solutions increases productivity and improves your bottom line. Find out more at www.efi.com.

Specifications

- Spot color definition of full tones and shades, manual and measurement based
- Spot color definition in L*a*b* (measured and manually), CMYK/CMYKOG/CMYKRGB (manually in %) and inkjet CMYK/CMYKOG/CMYKRGB (pure printer inks, manually in %)
